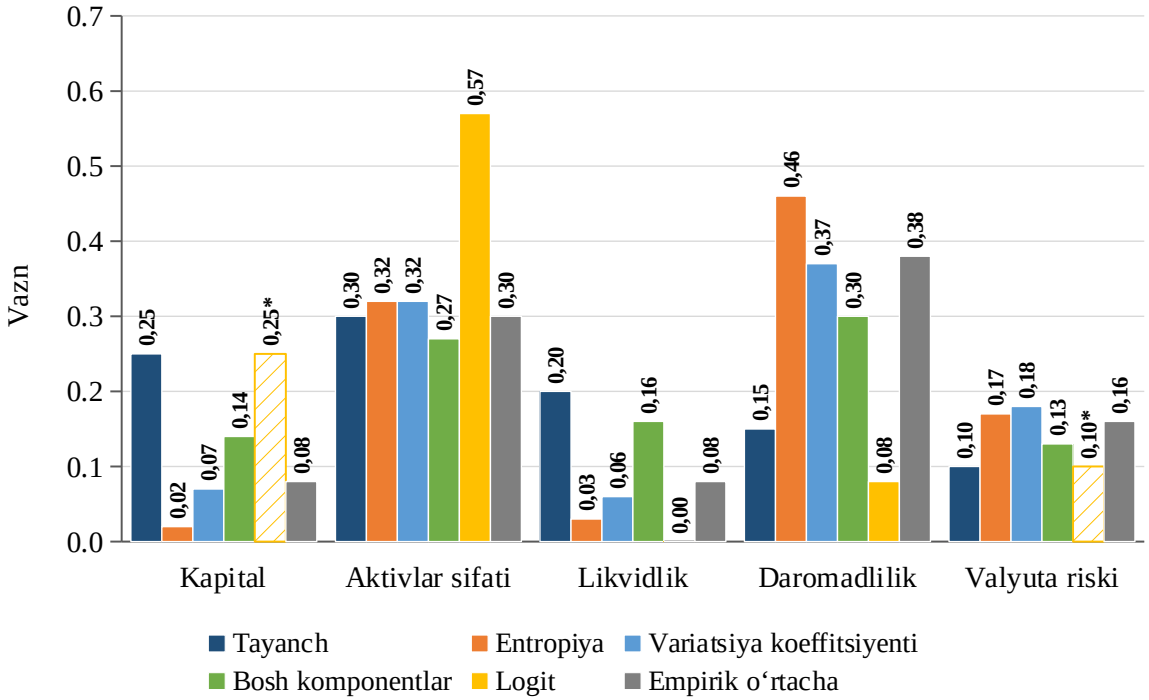
3.2.1-rasm (namuna)



Izoh: * – logit usulida baholanmagan, tayanch vazni saqlangan (shtrixli ustunlar); empirik o‘rtacha entropiya, variatsiya koeffitsiyenti va bosh komponentlar usullari bo‘yicha hisoblangan.

3.2.1-rasm. Integral indeks bloklarining tayanch va empirik vaznlari

Matndagi o‘zgarishlar:

1) Rasmdan oldingi xatboshida: ~~Eng katta farq likvidlik va daromadlilik bloklarida kuzatiladi:~~ → Likvidlik va daromadlilik bloklarida ham sezilarli farq kuzatiladi:

2) Rasmdan keyingi xatboshida: Rasmdan ko‘rinib turibdiki, ~~usullar o‘rtasidagi farq asosan likvidlik va daromadlilik bloklariga tegishli.~~ → usullar o‘rtasidagi farq asosan kapital, likvidlik va daromadlilik bloklariga tegishli.

Asos: empirik o‘rtachaning tayanch vazndan farqi – daromadlilik 0,23, kapital 0,17, likvidlik 0,12, valyuta riski 0,06, aktivlar sifati 0,00.
